It is necessary to peel off the removable plastic foil protecting the adhesive glue before the application of canyon plus shingles.

RIDGE SEAL

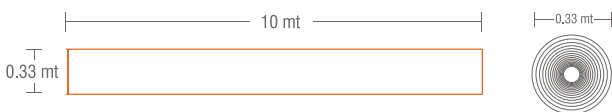

The ridge of a roof is the peak where two opposing roof planes meet. Getting a little more technical, the National Roofing Contractors Association defines the ridge as the "highest point on a roof, represented by a horizontal line where two roof areas intersect, running the length of the area."

Installation Method 1

Dusol Ridge Seal comes in a Roll of 10 m X 0.33 m. It can be installed directly over the ridge and hip.

- Fiberglass asphalt design
- 12.9" (330 mm) Wide
- 1 Ridge Seal Roll covers 32.8 linear feet

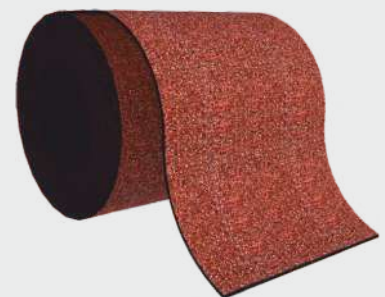

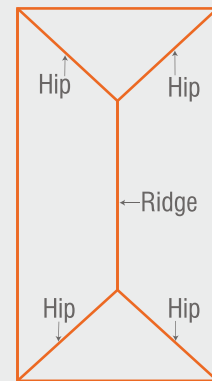

Installation Method 2

It can be cut into pieces of 12.9" X 10" and be placed on each other overlapping 4" leaving 6" exposed.

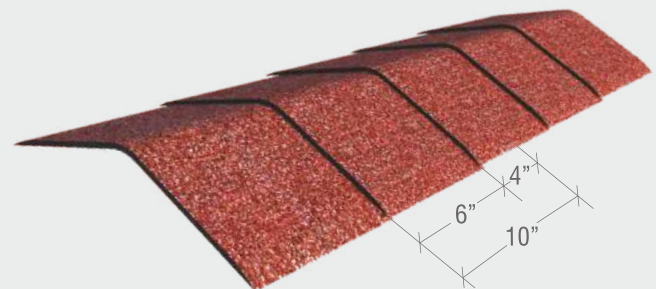

- 6" (152.4 mm) Exposure
- 4" (101.6 mm) Overlap
- 12.9" (330 mm) Wide
- Size of each Ridge Seal Tab 12.9" X 10"
- 1 Ridge Seal Roll covers 20 linear feet
- 39 pieces per roll can be obtained

Manufactured in accordance with TS EN 544 Standards

Dusol Ridge Seal is used to protect the most critical part of your roof (the Hip and Ridge). Dusol Ridge Seal Provide less labor intensive and a high quality solution to protect your Home.
